<th>BMP Title:</th>
<th>Regulatory Mechanism to Address Post Construction Runoff from New Development and Redevelopment</th>
</tr>
</thead>
</table>
| **BMP Description:** | The University’s regulatory compliance mechanism for post construction runoff from new development and redevelopment is the Utility permit that is enforced by the University Building Codes Department.  
University Building Standards Division 33 requires permanent stormwater treatment systems to be designed in compliance with the current MPCA Construction Stormwater Permit requirements and Section 20 of the current MS4 Stormwater Permit.  
Compliance with Division 33 is required to obtain a Utility permit.  
This is a system-wide BMP. |
| **Measurable Goals:** | Approved Utility permits for permanent stormwater treatment systems, annually |
| **Timeline/Implementation Schedule:** | Permitting of permanent stormwater treatment systems, ongoing  
Update University Building Standards Division 33 and Appendix M as required to maintain compliance with the current MPCA Construction Stormwater Permit requirements and Section 20 of the current MS4 Stormwater Permit, within 12 months of reissuance of a MPCA stormwater permit |
| **Specific Components and Notes:** | Permanent stormwater treatment system review for compliance with University Building Standards Division 33 via Appendix M, done by the University Civil Engineers  
Utility permit, permitting and permit compliance done by the University of Minnesota Building Codes Department |
| **Responsible Party for this BMP:** | Name: James Hilgendorf  
Department: University Building Official, Building Codes Department
